F 2682 HF (HORTICULTURAL FORMULA)

SPECIFICATIONS

		% by weight
Analysis:	Boron	0.03%
	Copper	0.60%
	Iron	3.50%
	Manganese	1.50%
	Molybdenum.....	0.005%
	Zinc.....	1.50%
Bulk Density, lbs.. per cubic foot		95.0
Particle Size		90.0% less than 20 mesh
Physical Appearance.....		Dark brown powder

SHIPPING CONTAINERS 25 pound multiwall paper bag with PE liner

PLANT LOCATIONS Ozark, AL

AGRONOMIC CONSIDERATION – This product is an excellent source of supply for both short and long term micronutrient needs of container grown plants. Trial suggested rate of one (1) pound per cubic yard of potting mix is suggested. Some very sensitive plants can be damaged by overfertilization.

MANUFACTURING CONSIDERATIONS -- Must be mixed thoroughly with fertilizer or whatever media is used as a carrier. Improper mixing will likely result in plant damage.
