

FRIT MICRO-CONTROL

(HORTICULTURAL FORMULA)

SPECIFICATIONS

		% by weight
Analysis:	Boron	0.05%
	Calcium.....	5.00%
	Copper	2.00%
	Iron	20.00%
	Magnesium	2.50%
	Manganese	4.00%
	Molybdenum.....	0.07%
	Zinc.....	4.00%
Bulk Density, lbs.. per cubic foot	95.0	
Particle Size	90.0% less than 20 mesh	
Physical Appearance.....	Dark brown powder	

SHIPPING CONTAINERS 25 pound multiwall paper bag with PE liner

PLANT LOCATION..... Ozark, AL

AGRONOMIC CONSIDERATION -- This product has been developed after many years of exhaustive field trials. This formula contains Calcium, which is important in cell wall strength. Its high iron content gives plants a dark green color. This product is very effective in bark/sand mixes. The particular ratio of elements to each other is generally recognized as the industry standard. A one (1) pound per cubic yard rate promotes more thorough mixing in the various potting soil combinations. This product is recognized as slow release due to the nature of the ingredients and is not dependent on a coating.

MANUFACTURING CONSIDERATIONS -- Must be mixed thoroughly with fertilizer or whatever media is used as a carrier. Improper mixing will likely result in plant damage.
